Aryan Sangal Portfolio Website

This project is a personal portfolio website built using **HTML** and **CSS**. It showcases information about me, my skills, hobbies, projects, and ways to contact me. The website is clean, responsive, and designed to present my profile professionally.

📌Features

1. About Section

- Displays my name, education details, and a short introduction.
- Includes an avatar image.

2. Hobbies Section

- Lists my hobbies along with images.

3. Skills Section

- Shows my technical and personal skills using a simple list format.

4. Projects Section

- Displays multiple beginner and intermediate-level projects.
- Each project is represented using a project card.

5. Contact Section

- Contains email and social media links.
- Footer with copyright information.

🛠️Technologies Used

- **HTML5** — For structuring the webpage
- **CSS3** — For styling, layout, effects, and responsiveness

---

📂Folder Structure

```
Project/
|-- Main.html
|-- style.css
└-- Assets/
    ├── Avatar.jpg
    ├── bad.jpg
    ├── Fam.jpg
```

```
        ├── game.jpg
        ├── cod.jpg
```

🗜️ How to Use

1. Download or clone the project folder.
2. Make sure the **Assets folder** contains all images.
3. Open `Main.html` in any web browser.
4. Customize the text, styles, or images as needed.

🕐 Customization

You can modify: - Colors (in `style.css`) - Images (inside `Assets` folder) - Projects, skills, hobbies - Layout or animations
